

SOLVENTS**SOLVENTS**

Aliphatic hydrocarbon, with a broad distillation curve, medium evaporation and good solvency power.

WHITE SPIRIT SOLVENT

Indicated in the dilution of long synthetic enamels in oil, degreasing and fat removal.

Characteristics

Tests	Specification
Density 20/4°C	0.765 – 0.800
Refractive Index 20°C	1.430 - 1.442
Odor/Appearance	Characteristic/Clear
Color Pt/Co	Maximum 10
Evaporation rate (n-butyl acetate)	11.5 – 12.5
Purity, Weight %	Minimum 99.5
Distillation Range 760 mmHg	153 – 216°C
Flash Point °C	43°C

KEROSENE

Indicated as degreaser and fat removal agent for cleaning in general.

Characteristics

Tests	Specification
Density 20/4°C	0.770 - 0.810
Total sulfur	< 0.05% mass
Distillation residue	1.5% volume
Distillation range 760 mmHg	155 – 230°C
Flash point °C	40 – 55°C

Technical Assistance

Anjo Tintas e Solventes maintains a specialized team available to customers for any query regarding its product line.

This information represents the best of our knowledge when this document was published. Remember that the good final result of the application of the products depends on factors that are beyond our control and that concern surface preparation and technical knowledge of the applicator. The company reserves the right to change these specifications without prior notice.

Handling and Storage

It must be kept at room temperature (25°C) or lower so that its initial characteristics do not change.

Expiration

12 months.

Packaging

0.9L, 5.0L, 18L cans and 200L drum.
